

IN THE SPECIFICATION

Please replace paragraph [0014] with the following replacement paragraph:

[0014] In summary, the present invention allows users to choose and replace the user interface ~~[[to]]~~ with a different language per their preference. Moreover, the new language can be displayed on the user interface without having to restart the application. Multiple installations or restarting of the application can be avoided when the user has a different language preference. Therefore, the present invention truly provides the feature of multiple languages ~~can be~~ used selectively in the same user interface.

Please replace paragraph [0022] with the following replacement paragraph:

[0022] In the present preferred embodiment, the external language file can be modified to comply with the desired language when there is no external language file corresponded to the desired language. For example, when a user chooses French language, the French external language file can be added into the original external language file to fulfill the user requirement if the corresponding French external language file cannot be found.

Please replace paragraph [0025] with the following replacement paragraph:

[0025] In summary, the present invention allows users to choose and replace the user interface ~~[[of]]~~ with a different language per their preference. Moreover, the new language can be displayed on the user interface without having to restart the application. ~~So as to the multiple~~ Multiple installations or restarting of the application can be avoided when a user has different language preference. Therefore, the present invention truly provides the feature of multiple languages ~~can be~~ used selectively in the same user interface.
